-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Masumoto et al. [US 5,815,060].

Matsumoto et al. discloses an inductance element [figure 4] comprising:

- at least one magnetic wound core having a hollow part [figure 2], which is formed by winding a magnetic ribbon therearound;
- a lead [4] having a cross sectional dimension smaller than an inner diameter of the hollow part of the magnetic core, which is passed through the hollow part; and
- a case [5] with a hermetically sealed structure that accommodates the magnetic core, wherein the lead is passed through the case in a hermetically sealed state.

Matsumoto et al. inherently discloses a clearance between the hollow part of the magnetic core and the lead.

### ***Allowable Subject Matter***

Claim 3 is allowed.

### ***Response to Arguments***

Applicant's arguments filed 1/19/2006 have been fully considered but they are not persuasive.

Art Unit: 2832

Applicant argues that Matsumoto does not explicitly disclose a clearance between the hollow part of the magnetic core 2 and the lead line 4. Instead, the magnetic core 2 appears to be disposed directly on the lead line 4.

The examiner disagrees. Matsumoto discloses magnetic core [2, 3] wound around the lead line [4], during the winding process, a small gap or clearance would exhibit between the magnetic core and the lead line. Applicant do not define how big of the clearance between the lead line and the magnetic core.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
